FIRE DETECTION AND ALARM SYSTEM

Fire Detection and Alarm System (FDAS) is a common and one of the most important fire safety systems, this provides early detection of fire and notifies the personnel in the area through visual and/or audio alarms.

Our FDAS offer includes Addressable, Conventional, and Semi-Addressable and even VESDA systems that vary depending on our client's requirement.

Our fire alarm technical team has a vast knowledge of installation and troubleshooting of FDAS. The team installed countless fire alarm systems in our portfolio and was trained in the installation and programming of addressable systems.

VANTAGE FIRE INC
YOUR FIRE SAFETY PARTNER

GAS SUPPRESSION SYSTEM

Our all UL/FM approved **FM200 and Novec1230 fire suppression system** provides fire safety for assets that has the highest value such as data center, museums, control rooms and other important areas for your valuable assets.

With the best brand partnered with well trained and experienced team for Design, Installation, Maintenance Service, Testing and Commissioning, everything is inline to give you the right fire solution you need.

KITCHENHOOD FIRE SUPPRESSION SYSTEM

Lehavot's UL, LPCB and EN:17446:2021 listed KitchenShield, is the most cost-effective solution that meets the difficult challenges found in modern commercial kitchens.

KitchenShield is pre-engineered for high flexibility (2 –200 FP's) and the simplification of installation. We designed it thinking about the installers.

KitchenShield System Structure

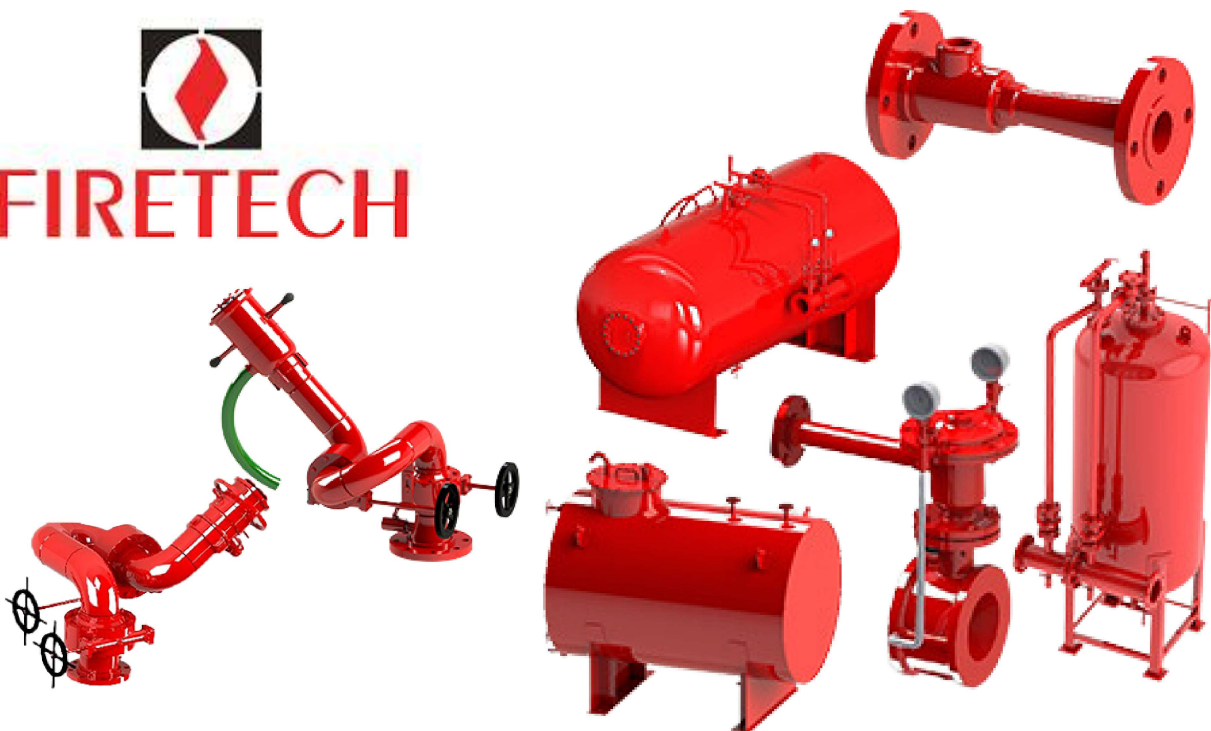

FOAM SUPPRESSION SYSTEM

Our Firetech brand provides a broad portfolio of water, foam and powder-based fire-fighting and detection products. Firetech products have been field tested over the last 2 decades across the globe. Also comply to the global and local testing and carry various approvals including UL, CE, IS and many more to comply with NFPA, OISD and other global requirements.

Firetech water monitors robust products designed with advanced technology and have been tested to provide the high-quality water jet and fog patterns. Firetech foam and water monitors have huge range covering flows from 750 gpm to 2000 gpm made of Stainless-Steel body. Firetech foam and water monitors are UL Listed.

YOUR FIRE SAFETY PARTNER

WET STANDPIPE SYSTEM

Standpipe systems consist of piping and hose connections installed throughout a building to provide reliable water for the manual suppression of a fire by either the fire department or trained personnel. Chapter 6, outlines design and installation requirements for standpipe and hose systems.

Using our UL/FM approved brands our clients can ensure reliable fire fighting equipments in case of fire.

ROOM INTEGRITY TEST

Gaseous fire suppression systems are effective options for protecting valuable assets by extinguishing fires without damaging equipment in the space. In many applications however the best designed system might not be fully effective if the integrity of the room with the protected equipment itself is not

Testing the room integrity is necessary to ensure the ability of a compartment to maintain adequate agent concentration and for evaluating agent hold time as a function of compartment leakage measured by the door fan pressurization method.
